System Requirements:

Kerbal Space Program requires a powerful computer with support for running Windows 7, 8, or 8.1. The screenshots provided with this installation guide are from Windows 10 64-bit, but should work for most other OS's as well. If you are running Mac or Linux, please email me and I will reply with any necessary instructions. Important! The Kerbal Space Program installer is a 32-bit installer. The game does not support 64-bit Windows operating systems and may crash or cause a security risk. Please read this link for more details.
