Is endothelin involved in coronary atherogenesis?]. Endothelin is synthesized by the endothelial cells of the endothelium of the blood vessels. As a result of atherogenic treatment of experimental animals, the circulating level of endothelin increases and causes a rise in blood pressure. Clinical observations of these findings lead to the hypothesis that endothelin plays a role in coronary atherosclerosis. The degree of coronary atherosclerosis can be measured by means of sonography, and endothelin measurements are performed in coronary patients and controls. In young patients with coronary atherosclerosis, there are no significant differences between coronary patients and controls, whereas in elderly patients, a significantly higher endothelin level is found. By means of two pilot studies of endothelin in coronary patients, a positive correlation is shown with the degree of coronary atherosclerosis, and stepped from the corner to his right. Then, Hakeem allowed the right hand to step and instead turned to his left as the right hand stepped again. Hakeem had the defender guessing with each step, and could have been out of bounds. Allowing Hakeem to march freely without any opposition would have been the best idea. As it is, the only person who could have stopped the play was the defender. That calls into question Arizona's plan to run certain plays. The assignment of Kenrich Williams, a man with questionable instincts, to guard Washington was also perplexing. The first, obvious play out of this was to send Williams on a trap blitz, and a safety coming from the opposite side of the field would have disrupted the play. Facing a lot of space, Washington did get the ball out of his hands in time to start a climb up the middle, but as the line holds, he was
